

Supplementary Material

Full search terms and strategies: 2020 search

This supplementary material provides full details of search strings used for bibliographic databases and trials registers, with dates and number of references returned and notes explaining any unusual search techniques or syntax. The EndNote X9 import order is provided, as the deduplication technique keeps the first uploaded copy of the reference by default.

In all searches, numbers in parentheses at the end of each row show the number of hits retrieved.

Search strategy notes	<p>This is the search that all other database searches are based on.</p> <p>Search lines ending in a '/' are subject heading searches. Search lines ending in '/ab' are subject headings with subheadings added. The subheading is listed in square brackets at the end of the line.</p> <p>Search lines beginning 'exp' are exploded subject heading searches.</p> <p>Search lines ending in .ti,ab,kf. search in the title, abstract and author keywords only.</p> <p>Search lines ending in .jw. search in the journal title only.</p> <p>or/x-y combines search sets in the range x-y with Boolean operator OR.</p> <p>* is used for truncation of words. # is used for a compulsory wildcard. ? is used for an optional wildcard. adjn searches for terms within <i>n</i> words or each other.</p>

	Words in square brackets [] are comments and are not included in the search terms.

Search strategy notes	<p>* is used for truncation. ? is used for an optional wildcard. Search strings ending with :ti,ab,kw search the title, abstract and keywords only. NEXT searches for terms next to each other, in the order entered. NEAR/<i>n</i> searches for terms within <i>n</i> words of each other.</p> <p>Due to interface issues, the search was split into three parts:</p> <ol style="list-style-type: none"> 1. population and whole-school interventions which have an impact on levels of violence, 2. population and whole-school interventions which have an impact on substance abuse, 3. population and whole school interventions which have an impact on educational attainment <p>As the Cochrane Library contains systematic reviews or trials, the limit to quantitative methodologies was not added.</p>

Full search terms and strategies: 2021 search update

[About this appendix](#)

This supplementary material provides full details of all search strings used for the 2021 update to searches on bibliographic databases and trials registers. It includes dates and number of references returned and notes explaining any unusual search techniques or syntax. The EndNote X9 import order is provided, as the deduplication technique keeps the first uploaded copy of the reference by default. After deduplication, papers retrieved by the 2020 searches were removed so only items retrieved in the update were screened.

All searches were run across the entire database unless otherwise noted. In all searches, numbers in parentheses at the end of each row show the number of hits retrieved.

Search strategy notes	<p>This is the search that all other database searches are based on.</p> <p>Search lines ending in a '/' are subject heading searches. Search lines ending in '/ab' are subject headings with subheadings added. The subheading is listed in square brackets at the end of the line.</p> <p>Search lines beginning 'exp' are exploded subject heading searches.</p> <p>Search lines ending in .ti,ab,kf. search in the title, abstract and author keywords only.</p> <p>Search lines ending in .jw. search in the journal title only.</p> <p>or/x-y combines search sets in the range x-y with Boolean operator OR.</p> <p>* is used for truncation of words. # is used for a compulsory wildcard. ? is used for an optional wildcard.</p> <p>adj<i>n</i> searches for terms within <i>n</i> words or each other.</p> <p>Words in square brackets [] are comments and are not included in the search terms.</p>

Search strategy notes	<p>* is used for truncation. ? is used for an optional wildcard. Search strings ending with :ti,ab,kw search the title, abstract and keywords only. NEXT searches for terms next to each other, in the order entered. NEAR/<i>n</i> searches for terms within <i>n</i> words of each other. Due to interface issues, the search was split into three parts:</p>

1. population and whole-school interventions which have an impact on levels of violence,
2. population and whole-school interventions which have an impact on substance abuse,
3. population and whole school interventions which have an impact on educational attainment

As the Cochrane Library contains systematic reviews or trials, the limit to quantitative methodologies was not added.
