

e-prescribing Conference

Deriving value from hospital electronic prescribing and medicines administration systems to improve safe, effective and person centred care

Monday 17th June 2013

Evaluation Summary = Total 41

How did you find out about the event?				
Word of mouth	From a colleague	Internet	Email	Other (please specify)
2	21	2	14	1 x Previous Conference 1 x Uni of Edinburgh project

Did you find the conference website clear and concise?		
Yes	No	Not applicable
34	4 1 x Some info blank or under construction 1 x little info	3

1 – very poor

5 – excellent

	1	2	3	4	5
Administration prior to event and welcome		1		25	15
Conference venue				5	36
Catering facilities			4	18	19
How do you rate the documents provided?		1	5	26	9
How do you rate the overall quality of presentations?			3	17	21
How do you rate the overall quality of workshops?			3	23	15
How do you rate the overall quality of exhibitors?			6	27	8
How do you rate the quality of the conference overall?			3	15	23

Please list below any other topics that you might like to see covered in future conferences / workshops:

- Up and coming systems/developments.
- What are suppliers doing to move the systems forward.
- Hardware – what works?
- Culture impacts of introducing electronic systems “the computer says x, so it must be right!!”
- Engagement
- Post implementation reviews – what should be done.
- More experiences from other sites implemented HEPMA how, when, etc.
- Deciding how prescribing alerts should be displayed and responded to.
- Detail of toolkit.
- How the £260m has been used....
- EPMA and patient admission/discharge risks and communication into primary care.
- Patient involvement.
- More information regarding successful implementation.
- Practical help in implementation.
- Tips for business cases.
- How to connect HEPMA to other hospital processes and systems eg discharge process, links to GP systems, links to EPR and PAs etc.
- I walk through of what a good e-prescribing system would look like.
- Outcomes for patients linked to IT e-prescribing initiatives.
- More on experiences from other Trusts.
- Sharing of successful business cases.
- Sharing of successful developments / documents etc.
- To be honest, revisiting the ??? would be very helpful. Maybe something around localising systems. Specifically considering the balance of how much decision support to adopt.
- Workshops could have had 15 minutes more for discussion/questions. Detail good!
- Reduce keynote sessions to facilitate. Generalise of less use.
- Feedback on any novel e-prescribing studies impact on care, safety, £ etc.
- Some more focus on administration and post implementation implications and transformations charges that have occurred. Reference but not really exposed!
- Information of HEPMA and supply systems eg bar code reader.

Additional comments:

- Make workshops more practical and interactive – rather than just another presentation with questions.
- A valuable and informative day – thank you.
- More time in workshops – reduce lunch and / or coffee breaks.
- Very useful and informative.
- Too little choice for catering.
- Some of the presentations were average but most of them good!
- Temperature control poor.
- Venue awesome.
- Seats too tightly packed.
- Lunch service inefficient.
- Thank you!
- Please may I have any information about the funds and tools?
- Good job!!
- I would like presentation handouts on the day.
- Workshops better than presentations.
- Great venue.
- Handouts for slides would have been a great benefit so note could be written on slides.
- Could have done with this being more than a single day.
- Lunch super! Venue excellent!
- Important to have workshops rather than lecturers all day, but pm workshop workstream 3 was lecture with questions.
- Very poor communication on venue location and agenda. Had to find this on web.
- Liked the reference to references throughout and provision in info pack.
