

The Pso Well training course: Managing Psoriasis and Wellbeing

Training outline:

The Pso Well training course (delivered by the IMPACT team - www.impactpsoriasis.org.uk) focuses on the complexities of managing psoriasis as a long-term condition with its associated co-morbidities. It draws on teaching principles about how to support patients to self-manage better and evidence based techniques supporting behaviour change to optimise psoriasis care.

The session will be vibrant and interactive throughout, and you will observe and then practice new skills to use in your time-limited consultations. The trainers are experienced in delivering this training to healthcare professionals and will be giving you individualised feedback on advanced consultation skills in real time. This course aims to provide cutting-edge knowledge and skills to optimise psoriasis care and is appropriate for all practitioners working with people with psoriasis.

Training course structure:

It will include 1 full day (9am - 5pm) of training and some associated exercises for evaluation of the training (including a short questionnaire and a 10-minute audio-taped standardised patient consultation to be completed on two separate occasions). Sessions will be held during July, September and October 2014 in a central location in Manchester city centre (further details to follow). All attendees will earn 8 CPD training points upon completion of the course.
