

## **Work-package 2 Phase 1 Healthcare practitioner (HCP) Stakeholder Advisory Group (SAG) Information**

The following questions were provided to the healthcare practitioners at the SAG to stimulate discussion:

- 1) Based on women's feedback, would you still be happy to talk to women about weight or refer to an intervention?
- 2) If no – what would be your alternative options? How would this fit with the guidelines?
- 3) Would you be happy to refer to a signposting intervention using existing NHS/community/online/commercial service?
- 4) How would this work in practice?
- 5) What would you need from the team in order to refer? (information, skills development....?)
