

# Feel as if your nose should have won a gold medal for running?

This trial is supported by the Medical Research Council and the National Institute for Health Research. In this trial, half of participants will receive the active vaccine and half will receive a dummy vaccine.

To register or find out more visit: [www.pollenLITE.co.uk](http://www.pollenLITE.co.uk)

If you long for a summer without the misery that hay fever brings, and you're aged 18-65 we invite you to take part in the **PollenLITE** clinical research trial.

The study will test a completely new type of vaccine that we hope could 'switch off' the allergy to grass pollen.

You will undergo allergy testing for the causes of hay fever and hay fever medications will be supplied free of charge during the summer of 2013. Your travel expenses will also be reimbursed.
