

The 3D Study: Improving whole person care

Regular feedback report on progress

24/11/2016

Thank you for providing details of your activity in relation to the 3D trial to improving the management of patients with multimorbidity. Here is your monthly report.

Date first patient recruited = 17/08/2015

Number of 3D patients in study: 43 (excl. those left, died or withdrawn = 39)

Progress in conducting 3D reviews

You need to complete the first round of 3D reviews (nurse & GP) by: 16/05/2016

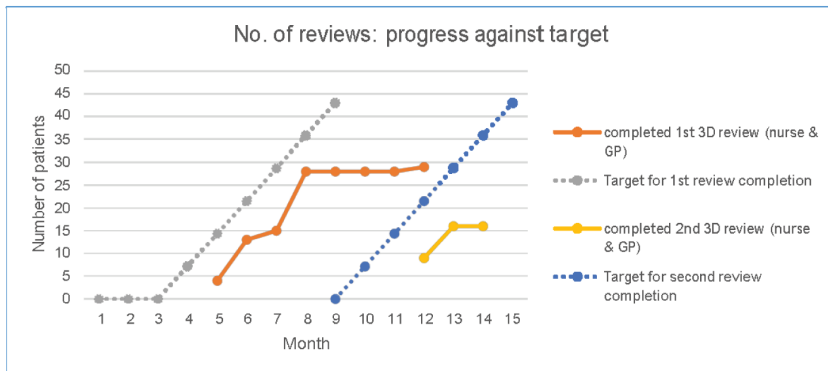

So far you have completed the first 3D review for : 15 patients

This includes 26 nurse reviews and 16 GP reviews

You need to complete the second round of 3D monthly reviews by: 15/11/2016

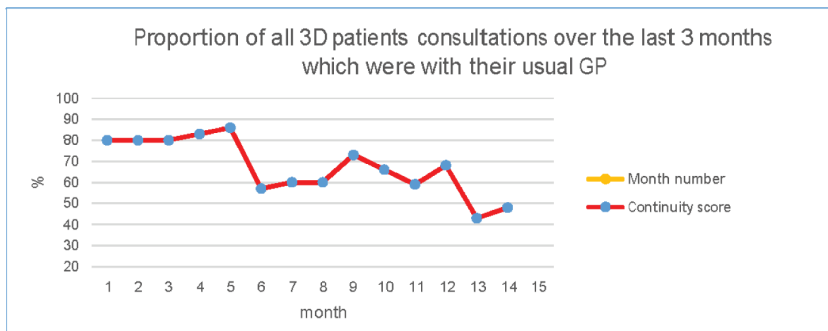

You have completed both rounds of 3D reviews for: 16 patients

This includes both nurse reviews for 17 patients and both GP reviews for 16

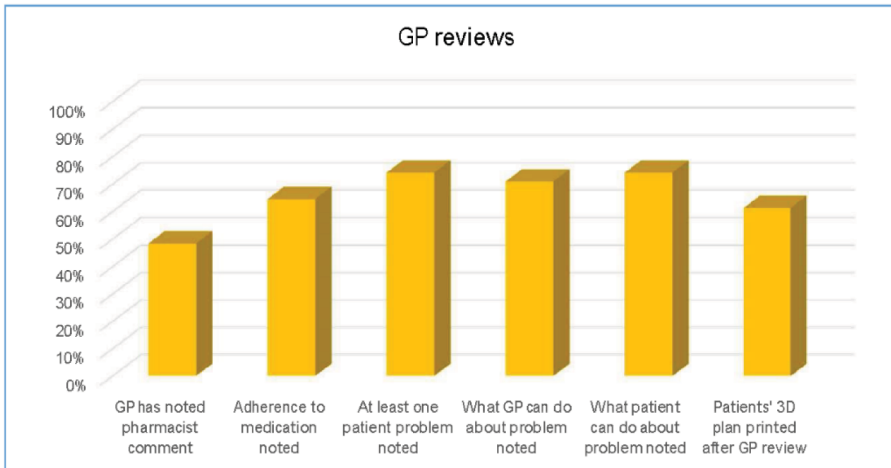

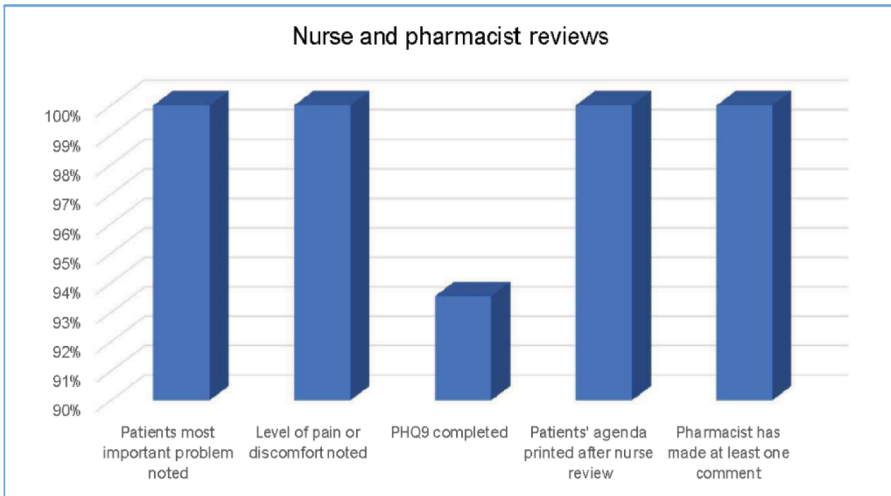

Continuity of care

You should be seeking to ensure that 3D patients see their usual GP whenever possible.

How well completed are your reviews?

This section summarises the proportion of patients (who have had a review) in which your nurses, pharmacist and GPs have completed some key aspects of the 3D review process at least once
