

The TIDieST (Template for Intervention Description for Systems for Triage) Checklist:*

Information to include when describing an intervention for online self-triage systems

Item number	Item	Relationship to original TIDIER Template
1.	BRIEF NAME Provide the proprietary name or generic name that describes the intervention.	AMENDED
2.	WHY Describe the objective of the intervention (<i>not the study</i>).	AMENDED
3.	WHAT Interface: Describe the physical characteristics of the interface, including layout, design and any adaptations for accessibility etcetera. Provide information on where the interface can be viewed (e.g. online, screenshots, demo, URL, research article figures).	AMENDED
4.	Procedures: Describe each of the procedures, activities, and/or processes used in the intervention, including any enabling or support activities.	UNCHANGED
5.	WHO PROVIDED For each category of intervention provider (e.g. psychologist, nursing assistant), describe their expertise, background and any specific training given.	DELETED
6.	HOW Describe how the system is accessed e.g. via Web pages, a remote computer, an app etcetera.	AMENDED

	WHERE	
7.	Describe the type(s) of location(s) where the intervention occurred, including any necessary infrastructure or relevant features.	DELETED
	WHEN and HOW MUCH	
8.	Describe the number of times the intervention was delivered and over what period of time including the number of sessions, their schedule, and their duration, intensity or dose.	DELETED
	TAILORING	
9.	Describe provision for particular disease groups or populations and how these differ from general provision.	AMENDED
	MODIFICATIONS/VERSIONS	
10.†	If the intervention was modified during the course of the study, describe the changes (what, why, when, and how).	AMENDED
	HOW WELL	
11.	Simulation/Laboratory Testing: How the intervention was tested and by whom.	AMENDED
12.†	Real world testing: How the intervention was tested and by whom.	AMENDED

** **Authors** - use N/A if an item is not applicable for the intervention being described. **Reviewers** – use ‘?’ if information about the element is not reported/not sufficiently reported.

† If the information is not provided in the primary paper, give details of where this information is available. This may include locations such as a published protocol or other published papers (provide citation details) or a website (provide the URL).

‡ If completing the TIDieR checklist for a protocol, these items are not relevant to the protocol and cannot be described until the study is complete.

* We strongly recommend using this checklist in conjunction with the TIDieR guide⁷ which contains an explanation and elaboration for each item.

* The focus of TIDieST is on reporting details of the intervention elements (and where relevant, comparison elements) of an online triage system. When a **randomised trial** is being reported, the TIDieST checklist should be used in conjunction with the CONSORT statement (see www.consort-statement.org) as an extension of **Item 5 of the CONSORT 2010 Statement**. When a **clinical trial protocol** is being reported, the TIDieST checklist should be used in conjunction with the SPIRIT statement as an extension of **Item 11 of the SPIRIT 2013 Statement** (see www.spirit-statement.org). For alternate study designs, TIDieST can be used in conjunction with the appropriate checklist for that study design (see www.equator-network.org).
