

Dear

We would like to invite you to a knowledge exchange workshop that we are holding to discuss the findings of the Electronic Records in Ambulances (ERA) study. ERA is a 2-year study funded by the NIHR, looking at the implementation and use of electronic patient records in ambulances. We have carried out a review of literature around this area; a survey of electronic record use in each ambulance service in the UK; and four in depth case studies with ambulance services, to look at how the records are used in practice. We are now reaching the end of the study.

At the workshop, we hope to bring together representatives from all UK ambulance services, commissioners, patient organisations, IT suppliers, and relevant policy makers. It will be an opportunity for us to share the findings from the survey of electronic record use in UK ambulances and the four case studies and invite discussion and feedback. It will also give those attending a chance to learn from others' experiences of implementation and to explore the future development of electronic patient care records.

Please feel free to pass this invitation on to other interested or relevant colleagues within your organisation, or let us know of the names of people who might be interested.

The workshop is being held at Room G01, UCL, 222 Euston Road, London on *Tuesday 3 July 2018, 13:00-15:30hrs*. Lunch will be provided from 12:00hrs, please let us know if you have any access or dietary requirements.

If you would like to attend, please respond to Neil Jenkinson at [REDACTED] by Tuesday 26 June 2018.

We do hope you will be able to join us on 3rd July.

Best wishes

Dr Alison Porter
Associate Professor of Health Services Research
